

1. Formulate (and rename?) ^{tentative} "The Projectivization Speculative Paradigm" in a manner parallel to "The Categorification Speculative Paradigm".
2. Try to take virtual tangles and the fundamental groups of their complements (i.e., mod a single strand by homotopy) seriously for the purposes of Akhmer-Terossian.
3. Speculative: Figure out Etingof-Kazhdan-Haviv for rooted trees.
