

A first attempt on F

August-15-08
9:21 AM

$$\log \boxed{F} = F \left[\text{diagram} \right] + g \left[\text{diagram} \right] + h \left[\text{diagram} \right]$$

can do without?

This is better done in the minimal co-alg
w-Alexander quotient, not in the absolute
minimal w-Alexander quotient!
