

IDNL Include, Do Not Link
DIPF Dynamic Inclusion Page Format
RPDL Recursive (Inclusion) Page Description
Language *Added March 17, 2009:
"HyperPlane"?*

The main point:

*Added May 8, 2011:
Perhaps some of this is already covered
by SVG and/or <canvas> and/or
Prezi?*

A "page" is collection of objects
with placements, images, text, etc.,
but links strongly discouraged. Instead,
the key type of object will be a
an inline insertion of another page.

It is the responsibility of the viewer/
printer to truncate the insertion process
when necessary. Sizes and placements will
always be relative.

should have a simple description and an
simple in-browser viewer. An "editor"
may come later.
