

In w, what's the dual cap?

April-23-10
6:57 PM

In w, there is a cap toy, with the property

Question Is there also a topological "dual cap" gadget, for which

Perhaps ribbon 2-knots should be re-defined so as to come with both an "internal" solid and an "external" solid? Except "internal" and "external" are the same, for tubes in 4D.

In w-world, is there a "thick tube" opposite to "thin tube" = "1D paths"?
