

3 Ideas

July-25-10
6:01 AM

1. Ask for a Canadian citizenship, with a clear cover letter explaining my disagreement with the oath.
2. Invite myself to a Palestinian university, with a long letter explaining my political position (or the lack of one).
3. Prepare a week-long course on surfaces - machines and roaches, classification, Euler characteristic, Seifert surfaces for knots, a word on 3D and the Kirby calculus. A possible second week would be about the Poincare conjecture and the Poincare homology sphere. (what's the simplest invariant that detects thy?)
