

# Hallucinations About Khovanov-Rozansky-Rasmussen

May-26-11  
9:19 AM

The Rasmussen structure on Khovanov-Rozansky homology (regarding the relationship between different values of  $N$ ) is a homological lift of the Belavin-Drinfel'd net of Lie bialgebras starting from the classical Lie bialgebra on  $\mathfrak{gl}(N)$  and ending with the co-commutative Lie bialgebra on  $\mathfrak{gl}(N)$ .
