From Enriquez' paper on universal Lie bialgebras.

Page 6:

$F(n,m) =$

$$\bigoplus_{(p_{ij}) \in \mathbb{N}\{1, \dots, n\} \times \{1, \dots, p\}} \left( \bigotimes_{i=1}^n FL_{\sum_{j=1}^m p_{ij}} \otimes \bigotimes_{j=1}^m FL_{\sum_{i=1}^n p_{ij}} \right) \prod_{(i,j) \in \{1, \dots, n\} \times \{1, \dots, m\}} \mathfrak{S}_{p_{ij}};$$
