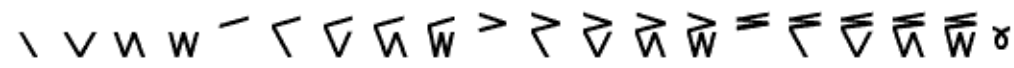
The “font” came from http://en.wikipedia.org/wiki/Inuit_numerals:

```
fontline =
```



```
ImageDimensions[fontline]
```

```
{538, 29}
```

```
font = Table[
   pitch = 26.82;
   Show[ImageCrop[ImageTake[fontline, {1, 29}, {k * pitch + 7, k * pitch + 27}]]],
   {k, 0, 19}
  ] // RotateRight
```

```
GraphicsRow[
 font[[1 + First[RealDigits[π, 20, 40]]]],
 0]
```

```
digits = IntegerDigits[(8! * 3^8 * 12! * 2^12) / 12, 20]
```

```
{1, 6, 7, 19, 11, 8, 8, 17, 18, 3, 18, 1, 12, 0, 0, 0}
```

```
GraphicsRow[font[[1 + digits]], 0]
```
