

1. Decide on a good  $J$ -test.
2. Make explicit the infinitesimal properties of  $J$ .
3. Implement/test/clean 4 ODE derivations of  $J$ :

	$J_u$	"Miss $J$ " $P_u$
$h$ -action axiom	done/not done	?
$t$ -action axiom	?	?

4. Make all fit on one cheat sheet.
