Do I need a general statement about  
 $\text{Proj}(\ker(G \rightarrow H))$ ?

A MathOverflow question about presenting the  
 pure braid group?

---

Is there a bijection between Taylor expansions  
 for  $PB_n$  & UFTI's of  $B_n$ ?

IF so, it is much easier to decide if  $PB_n$   
 has the expansion extension property: We  
 just need to find  $Z(\sigma_i)$ .
