

The other splitting

March-18-15 9:14 AM

$$1 \rightarrow F_{n-1} \rightarrow PB_n \begin{matrix} \xleftarrow{d_{n-1}} \\ \xrightarrow{S_n} \end{matrix} PB_{n-1} \rightarrow 1$$

d_{ij} : double strand $\#(n-1)$.

S_n : drop strand $\#n$.

Is it "almost direct" $?$
