

Mathematica textbook notes

April-10-15 5:42 PM

1. Gerstein, QA76.95: The Mathematica Primer, by Coombes, Hunt, Lipsman, Osborn, Stuck: Thin, about 200 pages. Ancient - Windows 95. Too thin.
2. Gerstein, QA76.95: Mastering Mathematica, 2nd Edition, by Gray: About 600 pages, 1994. Has a chapter on Object Oriented Programming. Good but outdated.
3. Gerstein, QA76.95: Mathematica as a Tool, by Kauffman: About 400 pages, 1994. Looks ok, outdated.
4. Gerstein, QA76.95: Mathematica by Example, 2nd Edition, by Abell and Braselton. About 550 pages, 1997. Too much undergrad-level mathematics and not enough programming.
5. Online: Mathematica Cookbook by Mangano, 2010,
<http://proquestcombo.safaribooksonline.com.myaccess.library.utoronto.ca/book/mathematica/9781449382001>

On Amazon.ca: Wellin, Mangano, Hoste, Hazrat, Boccara, Trott (2), Borwein-Skerritt, Wagon
