Overall title: "de-representing Lie theory".

For the Belgians:

1. Are there still "language wars"? Are they just that? Is there a way out?
2. Why not split? Or merge into France/Netherland?
3. Are you happy in the EU?

Overall title: "Expansions". (Maybe "Power Series in Topology").

1. The Bern talk.
2. Knots, Vassiliev, Lie algebras.
3. Chern-Simons theory.
4. Braids, KZ, and Associators.
5. Back to w.

Bonus: "Commutators".
