

November 10 Questions to Gwenael

Tuesday, November 10, 2015 12:21 PM

1. Why is H^2 of a tangle group equal to 0?
2. Why is H^2 of a LOT/LOF group equal to 0?
3. Why are there expansions for such groups; in other words, why do the Milnor invariants exist?
4. Is there a non-tangle description of the Habegger-Lin $RPuB_n$?
