

QD in w

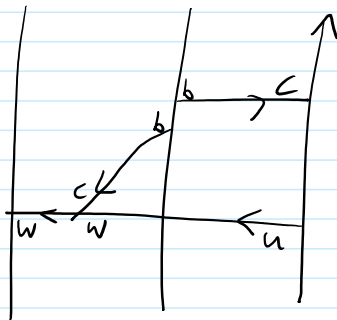

April 9, 2017 3:52 PM

STU on heads, TC on tails, no 4T or HT-STU.

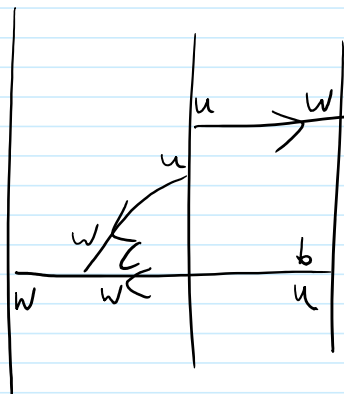

How at all does the result depend on co-products?

$$\longrightarrow = h \otimes l + w \otimes f = b \otimes c + u \otimes w$$

$$e^c e^u = e$$

$$e^{w,u} e^{u,w} = e^{w,b} e^{b,u} e^{u,w}$$
