

17-1350-AKT Post Mortem

January 11, 2017 7:04 AM

1. I should not have under-sold in the 5-minute presentation.
2. I should have emphasized the basics and not the research end.
3. Should have been Beauty/Beast rather than Gentle/Brute.
4. Contact sheet on day 1!
5. I should have presented the Kauffman bracket the Kauffman way, with A and B, thus injecting some mathematical content to class 1.
6. The "traditional" introduction to finite-type invariants works better than the gr /expansions way.
