Pensieve header: The 1206 riddle for MAT 257.

Consider the 2^n yellow balls of radius 1 with centers at the 2^n vertices of the n-dimensional cube $\{-1, 1\}^n$. Let C_n be the smallest box containing these balls, and let B_n be the largest blue ball centered at 0 bound by these balls. Compute $\lim_{n\to\infty} \frac{\operatorname{Vol}(B_n)}{\operatorname{Vol}(C_n)}$. PS. I wouldn't be asking, if I didn't think the answer was worth knowing.

```
\textit{In[*]} := \textbf{GraphicsGrid} \Big[ \Big\{ \textbf{Rasterize} \; / @ \; \Big\{
```

```
 \begin{aligned} & \text{Graphics} \big[ \big\{ \text{Yellow, Disk /@ Tuples} \, [\, \{1, -1\}, \, 2\,], \, \text{Blue, Disk} \big[ \, \{0, \, 0\}, \, \sqrt{2} \, -1 \big] \big\}, \, \text{Frame} \rightarrow \text{True} \big], \\ & \text{Graphics3D} \big[ \big\{ \text{Yellow, Ball /@ Tuples} \, [\, \{1, -1\}, \, 3\,], \, \text{Blue, Ball} \big[ \, \{0, \, 0, \, 0\}, \, \sqrt{3} \, -1 \big] \big\}, \\ & \text{ViewPoint} \rightarrow \big\{ 2.06766, \, -2.67826, \, -0.0415505 \big\}, \, \text{ViewVertical} \rightarrow \big\{ 0.465871, \, -0.399345, \, 0.789613 \big\} \big] \\ & \big\} \big\} \big] \end{aligned}
```
