

This is merely "Where to put the commas".

Favourable properties For (K, I) :

1. Quadratic
2. 2-injective.
3. 2-local, the 2-local presentation.
4. Syzygy complete.

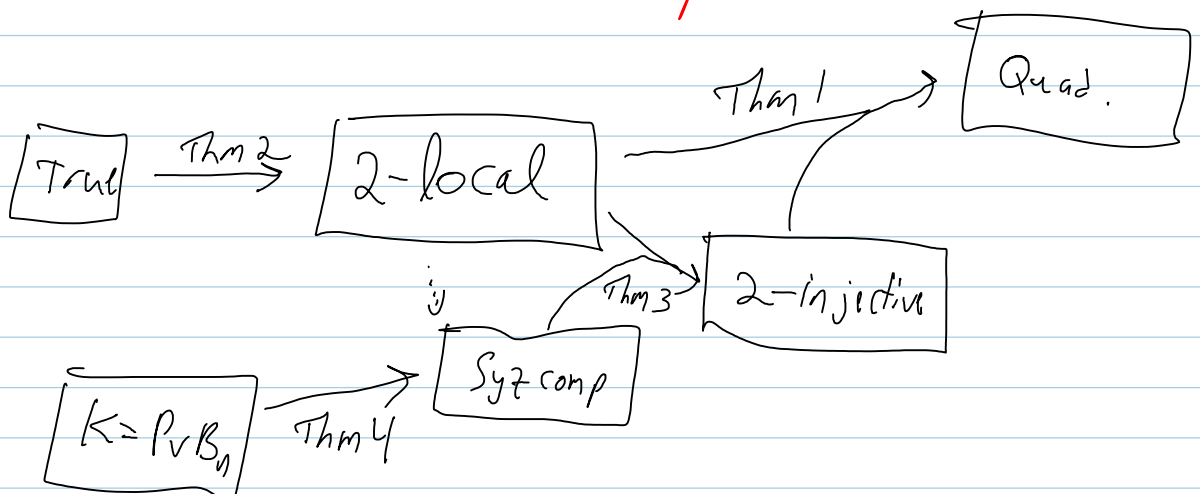

Thm 1 2-local & 2-injective \Rightarrow Quadratic

Thm 2 (K, I) is 2-local.

Thm 3 IF the 2-local presentation is syzygy complete, (K, I) is 2-injective.

Thm 4 [Lecture II] The 2-local presentation of PvB_n is syzygy-complete.

Added June 19: This may be the best I have, yet it still feels too complicated.
