A cold day. The roads were fine, but some of the bike paths were full off ice patches, and I often had to walk my bike across those. The first one I tried to ride across and found myself on the ground within about 3 seconds. I was really slow, so the damage was minimal. But getting up, on ice and with a bike, was pretty damn hard. That particular ice patch also ended up the longest - perhaps 300 meters.

```
