Pensieve work

Is there a server-side PDF viewer?

Move all descendent files to a "views/" subdirectory?
Advantages: - less clutter, clear distinction between "source" and "generated stuff",
     better ability to remove descendents after the sources have moved.
Disadvantages: the descendent files are a bit harder to locate while on local machine.

implemented on Aug 15-16

Make sure I can add a wiki link
to each page.

See that the PDF printer reverts to non-auto-save.

convert -density 150 -trim 2008-08.pdf 2008-08@%03d.png

Produce "orphan warnings".
