

## Remaining issues.

1. Do the Reidemeister. (Framing, Wess...)
2. Why not Duflo?
3. The A-T equivalence
4. The second A-T equation.
5. Tadpoles and non-unimodularity.

## Further issues.

1. The Alexander polynomial, Milnor numbers, etc.
2.  $u$ -knots & Drinfeld's associators.
3.  $v$ -knots & Etingof-Kazhdan
4. BF theory & the successful relation of path integrals.
