

Knot at Lunch on March 2, 2015: The Menu

March-02-15 3:31 PM

1. Kawauchi and Boden news.
2. Papadima olds.
3. Confession: I don't even know how to write a presentation of PB_n .
4. I still don't have a nice presentation of PB^1_n .
5. I still don't have a nice presentation of t^1_n .
6. It seems the "expansion extension property" mostly fails. Should we try braidors too?
7. Somebody should remind us the connection between integral homology sphere and vacuum diagrams.
8. A failure regarding a Kauffman AKT.
9. Maybe it's time to go back to the unitarity property of the Gassner representation.
10. Anybody else?
11. A video? Massuyeau at Swiss Knots?
