

**2.5. The Polyak Algebra.** The *Polyak algebra* is the quotient of  $\mathcal{A}$  by the following relations:

$$(7) \quad \begin{array}{c} \text{Diagram: } \\ \text{Two vertical lines with arrows pointing up and down, labeled } \varepsilon \end{array} = 0$$

$$(8) \quad \begin{array}{c} \text{Diagram: } \\ \text{Three horizontal lines with arrows pointing right, labeled } \varepsilon, -\varepsilon, -\varepsilon \end{array} = 0$$

$$(9) \quad \begin{array}{c} \text{Diagram: } \\ \text{Two rows of four terms each, each term consisting of two vertical lines with arrows pointing up and down, labeled } \varepsilon, -\varepsilon, \varepsilon, -\varepsilon. \\ \text{The first row has arrows pointing right, the second row has arrows pointing left.} \end{array} =$$
